Free for Construction Business Owners

The 100K Growth Blueprint

How We Took a Construction Business from $0 to $100K in 90 Days

> *Read this only if you are interested in growing your business. People that want to grow their company pay the price. You can have this PDF on your phone and never look at it — and keep your company stagnant. But if you take action, I can prove to you that this will change your company.*

SERVICEGROWTH AI — 2026

WHO THIS IS FOR

You're Great at Your Craft. Marketing? Not So Much.

This blueprint is for contractors who are tired of relying on word-of-mouth and ready to build a real lead generation machine.

- Pavers, painters, roofers, HVAC techs, landscapers, and general contractors
- You do incredible work — but your phone isn't ringing enough
- You've wasted money on ads that didn't work or agencies that overpromised
- You're ready to stop guessing and follow a proven, step-by-step system
- This is the exact playbook we used — no theory, no fluff, just results

MEET THE FOUNDER

This Blueprint Comes from Real Experience — Not a Textbook

Matt didn't learn marketing in a classroom. He learned it in the field — growing real service companies, solving real problems, and figuring out what actually moves the needle when your livelihood depends on it.

🎨

Chapter 1: His Dad's Painting Company

Matt started by growing his father's painting company in one of the most competitive markets in the country — the North Shore of Boston. The company was stuck doing low-end jobs, competing on price against dozens of other painters. Matt rebuilt the brand, repositioned them as a premium service, and took the company from over $100K/year in revenue to painting multi-million dollar homes. Same crew, same skills — completely different clients and completely different money.

🏗️

Chapter 2: The Outdoor Design Company

With 5+ years of marketing experience under his belt, Matt took everything he learned and applied it to his first construction company — an outdoor design business. Using AI-powered systems, automated follow-up, and the exact strategies in this blueprint, the company hit $100K in revenue in just 3 months. $3 per lead. All high-end clients. No tire-kickers.

🚀

Chapter 3: ServiceGrowth AI

Now Matt's mission is to give every contractor access to the same systems that transformed his businesses. ServiceGrowth AI builds the entire growth engine for you — start with paid leads to get cash flowing fast, then build your organic profile so you're getting leads from Google, Yelp, referrals, and everywhere else. The goal: never be dependent on ad spend alone.

OUR APPROACH

Paid Leads Start the Engine.
Organic Keeps It Running.

Most marketing agencies just run ads and call it a day. When you stop paying, the leads stop. We build something different — a company that attracts leads from every direction.

Phase 1: Paid Leads

Get cash flowing immediately.

- Google Ads targeting high-intent searches
- Facebook Ads with before/after creative
- $600 in free Yelp ad credits from our reps
- AI-powered speed-to-lead response
- Revenue starts in weeks, not months

Phase 2: Organic Growth

Build assets that generate leads for free.

- Google Business Profile optimized for local SEO
- Review generation system across Yelp + Google
- Professional website that ranks and converts
- Premium brand that attracts premium clients
- Leads come in even when ads are off

The companies that win long-term aren't the ones spending the most on ads — they're the ones who built an organic presence that works while they sleep.

RELATIONSHIPS & REFERRALS

Ads Get You Started.
Relationships Get You Rich.

Some companies depend on contractors and subs to get off the ground — and that's fine to start. But the real money isn't in chasing contractor referrals who send you their leftovers. It's in building relationships with the people who control the high-end projects.

📐

Stop Depending on Bad Referrals

Most contractor referral networks send you their worst leads — the jobs they don't want. You end up competing on price for scraps. We help you build your own pipeline so you're never dependent on someone else's leftovers.

✍️

Build Relationships with Architects

Architects spec the projects and recommend the contractors. One relationship with the right architect can be worth $500K+ in projects per year. We show you how to get in front of them and stay top of mind.

🏠

Connect with Interior Designers

Designers work with homeowners who have real budgets. When a designer recommends you, the client doesn't shop around — they trust the referral. These are the highest-close-rate leads you'll ever get.

🤖

AI-Powered Outreach

We use AI to identify architects, designers, and builders in your area, craft personalized outreach, and manage follow-ups automatically. Build a referral network without spending hours cold-calling or showing up to networking events.

The best contractors don't just run ads. They build a reputation and a network that feeds them premium projects year after year.

REAL CLIENT RESULTS

This Isn't Just Matt's Story.
Our Clients Are Winning Too.

01

Google Ads That Actually Convert

The exact setup that generates $5–$15 leads for local contractors

GOOGLE ADS

Stop Burning Money on Bad Keywords

Most contractors set up Google Ads wrong. They bid on broad terms, waste budget, and quit. Here's what actually works.

🎯

High-Intent Keywords Only

Target "paver installer near me", "roof repair [city]", "HVAC emergency [zip]". These people are ready to buy. We saw 25%+ conversion rates.

💰

Budget: $30–$50/Day to Start

Start with $30-$50/day on 5-10 exact-match keywords. Scale what works. Kill what doesn't. We hit $100K spending only $1,200/month on ads.

📍

Tight Geo-Targeting

Set a 15-25 mile radius around your service area. Exclude areas you won't drive to. Every dollar goes to people who can actually hire you.

📱

Call-Only Campaigns

For contractors, phone calls beat form fills. Set up call-only ads that ring your phone directly. Our cost per call averaged $8-$12.

GOOGLE ADS PRO TIPS

The Details That 10x Your Results

- Add negative keywords religiously — "DIY", "jobs", "salary", "how to" are costing you money
- Run ads only during business hours (or when your AI chatbot captures after-hours leads)
- Use ad extensions: location, call, sitelink, and callout — boosts CTR by 15-20%
- Write ads that mention your city — "Jacksonville Paver Installation | Free Estimates"
- Track conversions with call tracking numbers — if you're not measuring, you're guessing
- Check search terms report weekly and add irrelevant terms as negatives

02

Facebook Ads for Contractors

How to get a flood of leads from homeowners in your area

FACEBOOK ADS

The Before/After Strategy That Prints Leads

Facebook isn't like Google — people aren't searching for you. You need to stop the scroll with visuals that make homeowners say "I want that."

📸

Before/After Creative

Show dramatic transformations. Ugly driveway to beautiful paver patio. These get 3-5x more engagement than stock photos. Use real job site photos.

👥

Target Homeowners, Not Renters

Ages 30-65, homeowners, income $75K+, within 25 miles. Layer on interests like "home improvement", "HGTV", "Zillow". Exclude renters.

🔄

Retarget Everyone

Install the Facebook Pixel. Retarget everyone who visited your site but didn't call. These warm leads convert at 3-5x the rate of cold traffic.

📋

Lead Form Ads

Use Facebook's native lead forms — they auto-fill name, email, and phone. Less friction = more leads. We averaged $8-$15 per lead.

FACEBOOK CREATIVE FORMULA

The Ad Copy Template That Works Every Time

The Hook (First 2 Lines)

Lead with a result or transformation. Make them stop scrolling.

- "We turned this cracked driveway into a backyard paradise"
- "[City] homeowners: your neighbors are upgrading. Are you?"
- "This $12K patio job started with a free estimate"

The Offer (CTA)

Give them a reason to act NOW, not later.

- Free estimates with no obligation
- "Spring special: 10% off projects booked this month"
- "Limited spots available for [month] installations"
- Button CTA: "Get Your Free Estimate"

03

Premium Branding That Attracts Premium Clients

How we positioned ourselves as the high-end choice — and eliminated bad clients forever

BRANDING

Look Like a $10M Company Before You Are One

One of the biggest reasons we hit $100K in 3 months wasn't just ads — it was branding. When you look professional, you attract professional clients. When you look cheap, you attract cheap clients who haggle, complain, and waste your time.

🎨

Professional Visual Identity

Consistent logo, colors, and fonts across everything — your truck, website, business cards, uniforms, and social media. Homeowners judge you in 3 seconds. Look like the premium choice and they'll pay premium prices.

📸

Portfolio-Quality Photos

Stop posting dark iPhone photos from the job site. Invest in clean, well-lit photos of completed work. AI tools can enhance your existing photos to look professional. Your portfolio IS your sales pitch.

💰

Price Like a Professional

When your branding screams quality, you can charge 20-40% more than competitors with the same skillset. We stopped competing on price and started competing on presentation. Our average ticket went up $3K.

🚫

Cut Out Bad Clients

Premium branding filters out bargain hunters automatically. We learned to qualify leads by budget upfront — "What's your investment range?" If they can't afford you, refer them out. Your time is worth more than chasing $500 jobs.

BRANDING PLAYBOOK

How to Position Yourself as High-End

- Get a real logo — not a Canva template. It's the face of your company on every estimate, invoice, and ad
- Pick 2-3 brand colors and use them everywhere. Consistency = trust. Inconsistency = amateur hour
- Build a professional website that showcases your best work — not a free Wix site with stock photos
- Wear branded uniforms on every job. Branded trucks, branded shirts, branded everything. It's a walking billboard
- Write proposals, not text quotes. A professional PDF proposal with photos closes 2x more than "hey it'll be $8K"
- Show your process — consultations, 3D renders, material selections. High-end clients want an experience, not just a service
- Say no to projects that don't fit. Every $500 job you take is a $5K job you didn't have time for

04

The Yelp Strategy

$600 in free ad credits + organic domination from day one

YELP

Yelp Sends the Highest-Intent Leads. Period.

People on Yelp are actively looking for a contractor RIGHT NOW. We have reps at Yelp who get our clients $600 in free ad credits in the first month — so you can start running ads at zero cost.

🎁

$600 in Free Ad Credits

We work directly with Yelp reps who set up your ad campaign and get you $600 in free ad spend in the first month. That's real leads, real calls — at zero cost to you. We handle the setup.

⭐

Get Reviews on Autopilot

After every job, send a text: "Thanks for choosing us! A Yelp review would mean the world." Link directly to your Yelp page. Aim for 2-3 new reviews/month. Reviews compound over time.

📝

Optimize Your Profile

Complete every field. Add 20+ high-quality photos. Write a detailed description with your services and area. Respond to EVERY review — good and bad. This is your digital storefront.

💬

Respond to Leads Fast

Yelp tracks and shows your response time publicly. Respond within 1 hour. Contractors who respond in 30 minutes close 40% more Yelp leads. Speed + reviews = domination.

05

Speed-to-Lead System

The first contractor to respond books 78% of estimates

SPEED TO LEAD

You're Losing Leads While You're on the Job Site

The average contractor takes 3+ days to return a call. By then, the homeowner has already talked to 3 competitors.

⚡

60-Second Response Time

Every lead gets a response within 60 seconds. Not a human — an AI system that qualifies them, answers questions, and books the estimate.

🤖

AI Chatbot on Your Website

A 24/7 AI chatbot that knows your services, pricing, and area. It captures name, phone, email, address, and project details — then texts you the lead.

📲

Instant SMS Follow-Up

Every form fill and missed call triggers an automatic text. This alone recovered 30% of leads we would have lost.

🌙

24/7 Coverage

Nights, weekends, holidays. 40% of leads come after hours. If you're not capturing them, your competitor is. The AI never sleeps.

SPEED MATTERS

The Numbers Don't Lie

78%	391%	3 Days	60s
Win Rate for First Responder	More Conversions at 1 Min vs 30	Avg Contractor Response	Our Response Time

06

Follow-Up That Closes

Turn "let me think about it" into signed contracts

FOLLOW-UP SYSTEM

The Fortune Is in the Follow-Up

80% of sales happen after the 5th follow-up. Most contractors follow up once — maybe twice — then give up.

Day 0: Instant Confirmation

"Thanks for having us out! Here's a summary of what we discussed." Attach the quote immediately. Strike while the iron is hot.

Day 2: Value Add

"Wanted to share photos of a similar project we recently completed in your area. Happy to answer any questions!" Show, don't tell.

Day 5: Gentle Nudge

"Just checking in on your project. Our calendar is filling up for next month. Any questions I can help with?" Light urgency.

Day 7: Urgency Close

"Last follow-up — we have [X] spots left this month. If you'd like to move forward, we can lock in your date today."

PRO TIPS

Follow-Up Rules That Matter

- Text beats email for contractors — 98% open rate for texts vs 20% for email
- Always personalize — use their name, project type, and neighborhood
- Include photos of similar completed projects in your follow-ups
- Never be pushy — be helpful. "Any questions?" beats "Are you ready to sign?"
- Automate everything. If you're manually following up, you'll forget. Set it and forget it.
- Track which follow-up converts — for us, Day 5 had the highest close rate

07

Putting It All Together

The complete system running on autopilot

90-DAY ROADMAP

What $100K in 90 Days Actually Looks Like

Week 1–2

Set up Google Ads, Facebook Ads, optimize Yelp. Install AI chatbot and speed-to-lead system. Build follow-up sequences.

Week 3–4

First leads flowing. Refine targeting based on data. Dial in follow-up timing. Book first 5-10 estimates.

Month 2

System optimized. Leads consistent. Scale ad spend on winners. Revenue hits $30-40K cumulative.

Month 3

Full autopilot. 30+ leads/week. AI handles intake. Follow-up closes deals. Cross $100K revenue.

THE FULL SYSTEM

Your Lead Machine, Visualized

Lead Generation

Where the leads come from:

- Google Ads — high-intent local searches
- Facebook Ads — before/after scroll-stoppers
- Yelp — organic reviews + fast response
- Website — SEO + AI chatbot capture

Lead Conversion

How leads become revenue:

- 60-second AI response to every lead
- Auto-qualify: name, project, budget, timeline
- Instant estimate booking
- Day 2/5/7 automated follow-up sequence

The contractors who win aren't always the best at their craft. They're the ones who show up first, follow up consistently, and make it easy to say yes.
